Single Point Knitting Needles

Made from densified laminated birch wood, this material is more costly and much harder than either ebony or rosewood. Unlike in other wooden needles, water absorption in Symfonie wood needles is negligible and, as a result, there is no chance of warping. The same property makes our needles very strong, enables the points to be sharp and provides a lifetime of pleasurable use, if handled correctly.

Circular Aluminium Needles

Pony Fixed Circular Aluminium Knitting Needles are used for flat knitting: at the end of each row, just switch the needles around as you would with normal straight needles. Your project sits in your lap as you work, instead of hanging off the needles - much easier for larger, heavier projects. Circular needles also allow you to knit 'tube' projects, like socks, cowls and hats, in the round.

Addi SockWonder Fixed Circular Needles

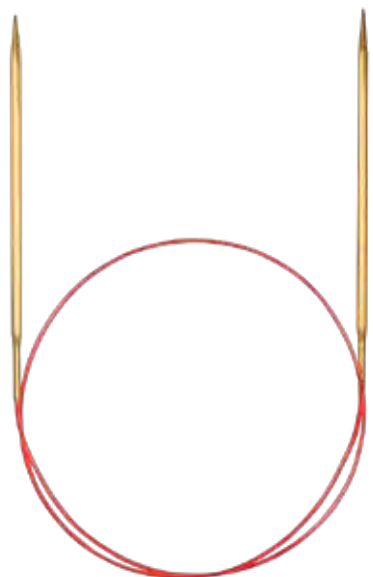

The 25 cm long circular knitting needle has its original addi gold cord between two needle tips of different lengths. One needle tip is 45 mm long and the other is 70 mm long. The idea was from a clever idea provided by a customer. The knitting of socks, sleeves, mittens and baby clothes in a circular direction are made much easier by the mini circular needle, as the longer tip is easier to take hold of.

addi-Swing Crochet Hooks

addi-Swings are ergonomically shaped crochet hooks that relieve the hand and shoulder while crocheting.

The handle was reinforced - the needle is therefore also suitable for those who crochet tighter. Well-designed and perfectly made for you in Germany.
